

Town of Forestville

Culvert Ordinance 1995-1  
(Re-Write of Ordinance 1993-1)

RE: Construction of private driveways to permit ingress and egress into privately owned properties.

1. All privately owned driveways into private properties that require any modification of the ditch area will have to conform to the Town of Forestville standards.
2. The Town Board, after examining the proposed driveway site, shall make a determination as to the requirements for that specific location.
3. All culverts are to be of steel construction and shall be of a length sufficient to facilitate the construction of a driveway minimum of twenty six feet, (26') in total width.
4. The determination of the diameter of the steel culvert will be made by the Town Board, who upon notification by the owner of the proposed driveway construction, will examine the site and, dependent upon conditions at the site location, choose the proper pipe diameter.
5. No driveway construction shall begin without Town board approval and all decisions pertinent to the construction by the Town board shall be incorporated into said construction.
6. Any driveway construction that does not conform to the requirements of this ordinance will be removed, and the cost of removal will be assumed by the property owner.
